DETAILED ACTION

Information Disclosure Statement

1. The prior art documents submitted by applicant in the Information Disclosure Statement filed on 2/25/2005 have all been considered and made of record (note the attached copy of form PTO – 1449).

Allowable Subject Matter

- 2. Claims 1- 17, 19, 20, and 22- 28 are allowed.
- 3. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in a combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 12, and 26, for example, which include, a method to reduce an optical intensity modulation having an acoustic- optic portion of an optical fiber within acousto-optic filter in order to create reflected wave that are orthogonal with respect to wave components that originally onto interaction portion and an acousto optic filter having a horn with an elliptical cross section coupled to the transducer and the acousto-optic filter and transducer cooperate to generate spiraling acoustic waves (claims 1 and 26); and a transducer is configured to receive three signal in three section, first signal having a phase difference with respect first

Application/Control Number: 10/650,386

Art Unit: 2873

component and a second signal having a phase difference with respect to a second component and generating first and a second spiraling wave and orthogonal to each other (claim 12).

Page 3

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The closest prior art

Zemon et al (4,068,191) discloses an acoustooptic modulator for optical fiber waveguide.

Morey et al (5,007,705) discloses a variable optical fiber bragg filter arrangement.

Kim et al (4,915,468) discloses an apparatus using two-mode optical waveguide with non-circular core.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mohammed Hasan whose telephone number is (571) 272-2331. The examiner can normally be reached on M-TH, 7:00 AM to 5:30 PM.

Application/Control Number: 10/650,386 Page 4

Art Unit: 2873

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Georgia Epps can be reached on (571) 272- 2328. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
